MEMORANDUM FOR : Director, Office of Research & Development

SUBJECT : Disposition of ORD's Electro-Optical Image Processing Equipment

1. The purpose of this memorandum is to express NPIC's interest in the Electro-Optical Image Processing equipment that your office is presently contemplating moving from the Ames Building. Our interest in your work in this area is reflected by the fact that [redacted] Experimental Lab/TSSG, was assigned full time to work with [redacted]. I am aware that you have not made a final decision on this equipment disposition, but during your deliberations we would like you to consider transferring it here. We have already considered where we would place this equipment in [redacted] and the approximate cost. This information is shown in Attachment 1. Of course, we would assume the cost for this move. Attachment 2 describes the types of experiments that we would envision performing.

2. If you decide on this course of action, I am sure some amicable arrangement can be set up with [redacted] and his people on the type of experiments that should be performed. In fact, discussions with [redacted] on the subject are presently underway. On the other hand, if your decision is to move the equipment elsewhere, then every attempt will be made to coordinate fully on the experiments and investigations since this work is important to our Digital Imagery Enhancement and Restoration programs.

3. If you have further questions, please contact [redacted] or myself. We will await your decision on this matter.

[redacted]  
Chief, Technical Services & Support Group, NPIC
